4 Courses

Linux Fundamentals

Managing Linux Systems

Securing Linux Systems

Linux Cloud and DevOps

May 1, 2026

FRU CHI EHUD NEBA

has successfully completed the online Specialization

Learning Linux for LFCA Certification

In this specialization, you have learned about the Linux operating system, services available, major distributions, how to manage and link files, combining commands for automatons, and creating new tools. You also explored different cloud computing models, managing virtual machines, using the Git version control system, DevOps and replicating environments. We also delved into security, applying permissions, authentication, local and remote system logging, connecting Linux computers together, managing users and devices, and installing application software on a Linux system.

Aspen Olmstead
Professor and Program Director
Simmons University

This certificate attests to the learner's completion of an online program delivered via Coursera. It does not constitute formal enrollment at any university or entity and does not itself grant academic credit, grades, or a degree. Institutions or organizations may, at their discretion, recognize this learning toward their own programs or credentials.
